

Dahua Security Software Professional 8.0

Scalable

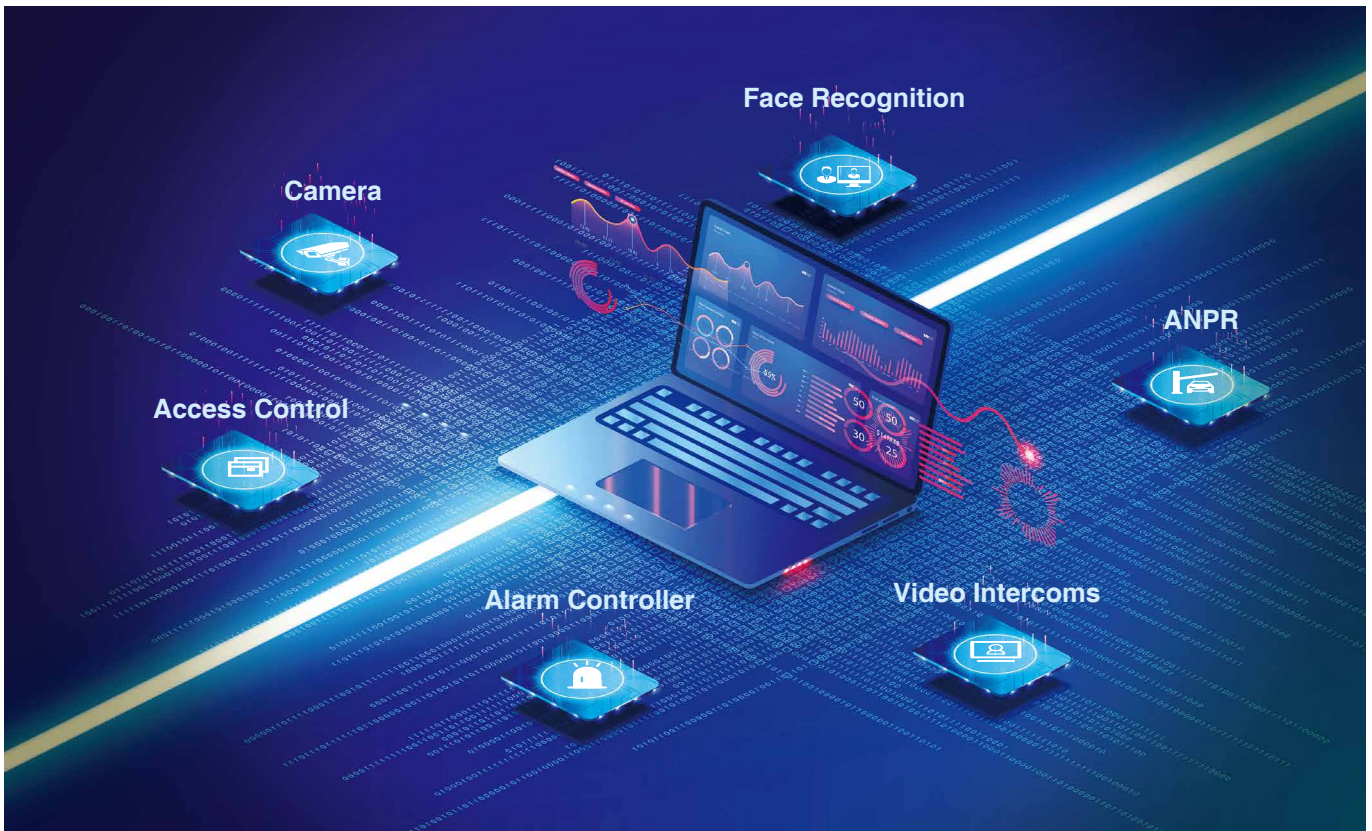

Reliable

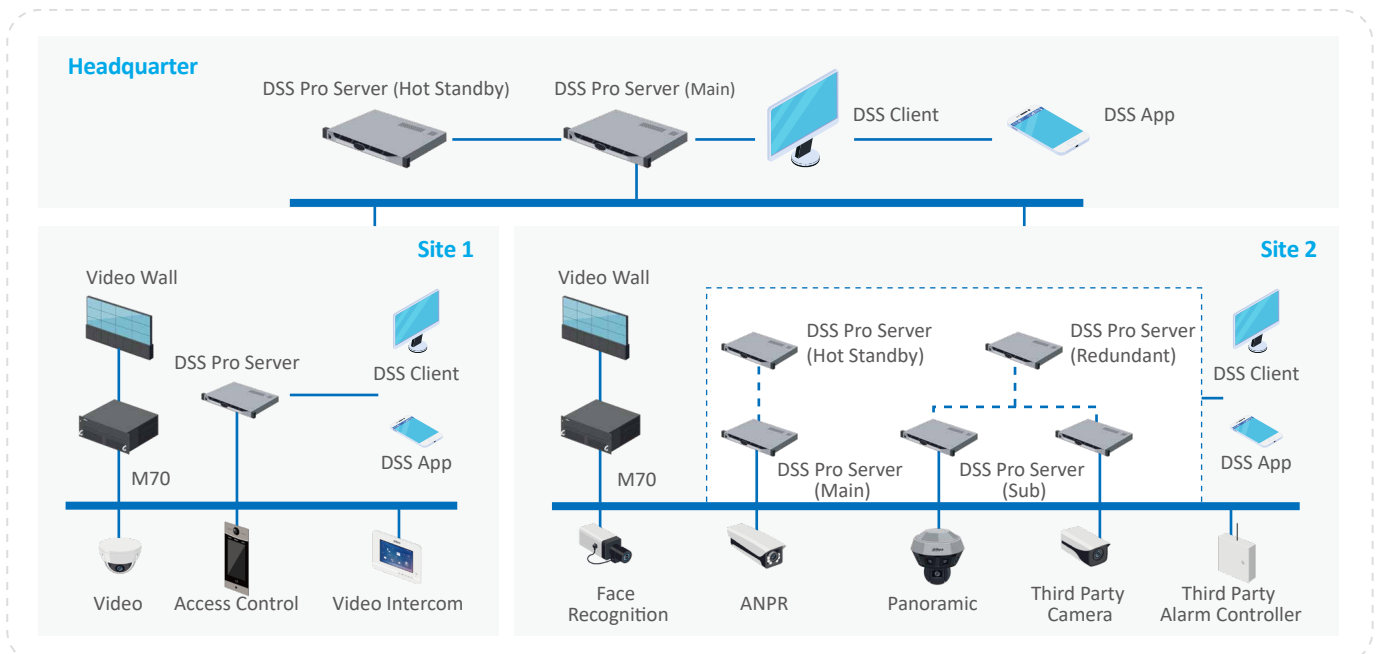

Professional

Customizable

DSS Professional is a centralized management system designed for large-scale and industrial applications. It enhances hardware performance and provides centralized video monitoring, access control, video intercom, alarm controller, POS, radar and AI features such as face recognition, automatic number plate recognition (ANPR), and video metadata. DSS Professional is ideal for real-time security monitoring and access control in a variety of industries, such as parks, chain stores, banks, oil & gas, and logistics.

DeepXplore

DeepXplore offers intelligent search of human and vehicle targets based on time and location.

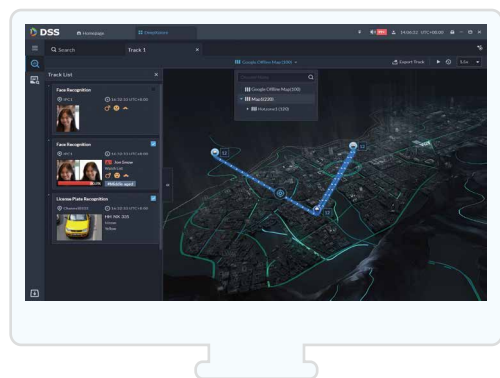

Quick Search Entry

- In the live view or playback interface of the monitoring center, you can pause the video, select the face image of the target and run image search.

Integrated Search

- Allows archiving of people and vehicle's entry and exit records, capturing images of people, saving driving records of vehicles, etc.

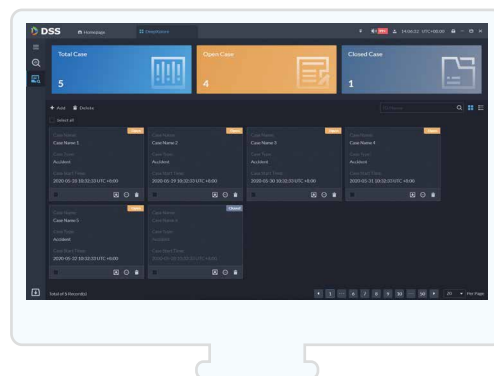

Activity Tracking

- Search for records of multiple event types, such as human body, face image, and identity confirmation, and form tracks in chronological order.

Case Archive and Report

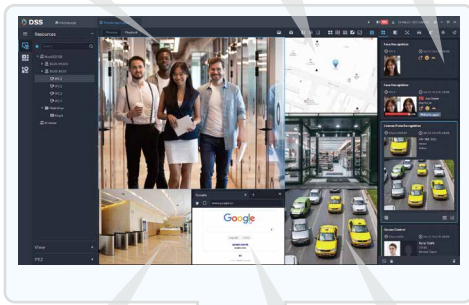

- A case library can be created in a unified manner to manage case-related events, pictures, videos, documents, etc.
- Generate and export system reports, including basic information, videos, pictures, and updated records.

ANPR

Small Monitor Center

- The DSS PC Client can provide multi-screen output and more multidimensional surveillance.
- It utilizes interface expansion on the right side to respond to events in time. By dragging an event entry to any window, the related video will then automatically play from 15 seconds before the event to 15 seconds after the event.
- It unifies Live View and Playback on the monitor, making it more convenient for users to operate it.

Maintenance Center

- The unified dashboard displays the status information of devices, channels, storage, servers, and faults.
- Different colors can be used to distinguish different status to quickly find abnormalities.
- It can display abnormal trends in the past 7 days, discover problems early, and automatically send operation and maintenance reports.

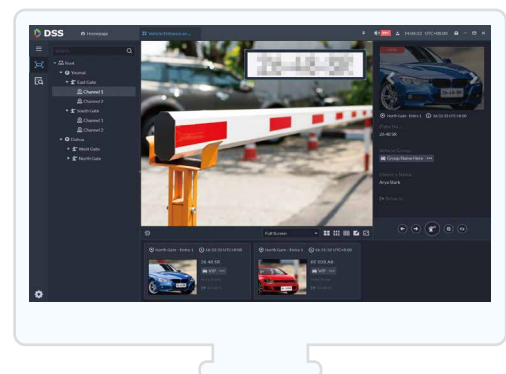

Event Management

- Various alarm sources can be managed on the DSS platform. Its powerful event center allows operators to take immediate action and speed up investigation.

Vehicle Entrance Management

- Adopts advanced ANPR technology and integrates VTO into a well coordinated vehicle management system, enabling a safe and efficient vehicle entrance and exit.

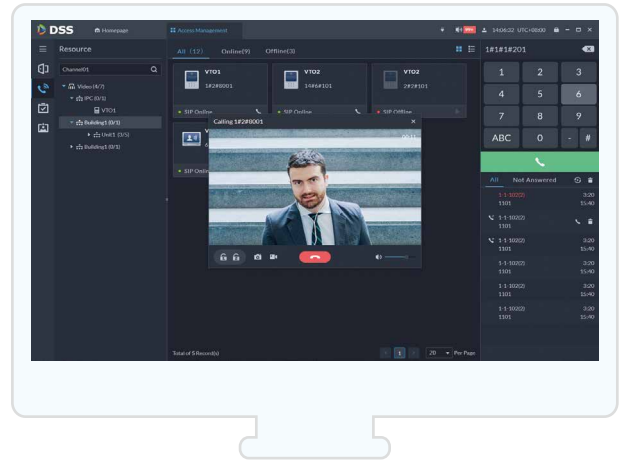

| Access Management

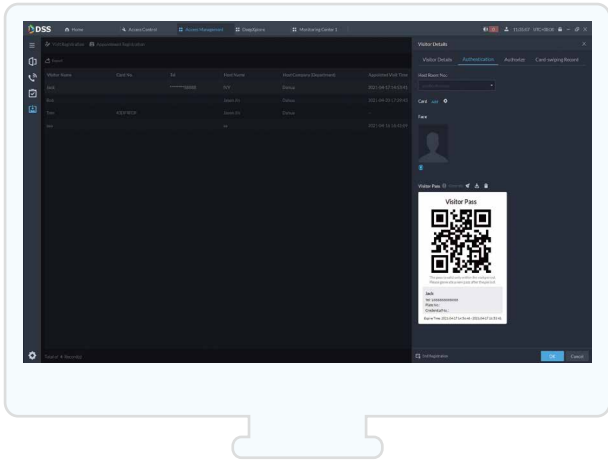

Manage the entry and exit of people in residential areas, parks and other scenes to improve automation and intelligence. It includes access control management, video intercoms, visitor management, and attendance management, realizing a multi-dimensional people management system.
